In addition, I wrote applications in Java.- simple interfaces. I master Spring.

Python - I'm interested in Artificial Intelligence (AI) and Machine Learning (ML).

Experience:

From 05-2014 to the present.

Web-Masters Group - *Frontend Developer.*

Development and implementation of web applications, interaction with other developers, from the choice of the framework and the definition of the architecture of the project to the implementation. Creation of simple online stores, landings. Mostly I work with the writing of questionnaires and tests.

List

I was engaged in development and creation of sites on CMS-Wordpress, creation of own themes of Wordpress, stretching HTML-templates on CMS, I succeeded in creating test sites-questionnaires for companies, HR-s. SMM-users. This was the starting point in my hobby for JavaScript.

I independently developed and wrote four extensions for Google Chrome and Mozilla Firefox. I am blogging about programming and creating blogs on blogspot. I lead two groups on programming in social networks (Facebook and Google Plus).

About me:

I constantly improve my knowledge on various online courses, seminars, meetings of developers. I read a lot of professional literature in English. I prefer original documentation, translations, although I myself often translate special literature (articles) and publishing them on your blog. I spend a lot of time improving my knowledge in technology. I'm writing small test tasks for new web developers. I really like to study myself and with great pleasure share knowledge with others.

I lead a healthy lifestyle, go in for sports (walking, swimming, gym). I'm dreaming of creating my online school and writing a book on web development.

Education:

Main - PetrSU

1994

Additional: Free Code Camp, Hack Reactor, Udacity, SOLOLearn, Hexlet.io, Geek Brains, Coursera, Udemy, Lambda School, Code School, try Git, Stackoverflow, Code Monkey, CodinGame.
